

Seesaw instructions for the week commencing: 25th of May

I would like the children to use any home materials they can find to make a 3D sail boat. This is an activity based on Friday's SESE sheet where the children are asked to make a 2D drawing of this boat. They can send a photo or video to me on Seesaw any day this week, showing the boat floating (hopefully!) on water. If possible, they could also decorate and perhaps even paint the boat. I look forward to seeing the finished products.
