

# Minibeast Spotter

Look out for these little minibeasts in the garden.

**Ant:** They work very hard all the time.

**Bee:** They get nectar from flowers.

**Wasp:** These can sting, so be careful!

**Ladybird:** These are red beetles with black spots. They can fly.

**Woodlouse:** You will find these under rocks and leaves.

**Earthworm:** Worms dig their way under the ground.

**Centipede:** You will find these under rocks.

**Snail:** These move very slowly.

There are lots more minibeasts for you to find.
