

# Naturalist Intelligence

Naturalist Intelligence is sometimes also called being 'nature smart'. It means that you tend to learn by connecting your understandings with the world around you.

Naturalist Intelligence is one of eight different types of intelligence that Howard Gardner wrote about in his 1983 book, 'Frames of Mind'. Most people are a mix of the eight different types and change types as they grow older.

## If you have high Naturalist Intelligence:

- You probably enjoy being outdoors and feel most at ease when you are exploring the environment in some way.
- You might also like collecting and sorting things you found outside such as seashells, leaves or feathers.
- You have a great understanding of how natural environments are connected and change with the seasons and like watching animals or insects going about their day.

## Learning tips for people with high Naturalist Intelligence:

Take your learning outside or near a window. If that is not possible, decorate your learning area with natural objects to help you relax and take in ideas.

Connect your ideas with the world around you in some way.

Take advantage of your ability to carefully observe and sort things to make connections in your learning.

## Career ideas for people with high Naturalist Intelligence:

Vet

Farmer

Geologist
