Fifth Class End of Year Maths Assessment

Write in numerals.

1. seven hundred and sixty-four _____
2. five thousand, six hundred and fifty _____
3. thirty-four thousand and twenty-one _____

Write in words.

4. 65 724 _____
5. 1005 _____

Put in order starting with the smallest.

6. 65 629 65 352 65 899 65 221 65 900

Complete.

7.
$$\begin{array}{r} 21\ 529 \\ + 22\ 136 \\ \hline \end{array}$$
8.
$$\begin{array}{r} 73\ 151 \\ + 12\ 964 \\ \hline \end{array}$$
9.
$$\begin{array}{r} 53\ 255 \\ + 39\ 291 \\ \hline \end{array}$$
10.
$$\begin{array}{r} 62\ 900 \\ + 4\ 081 \\ \hline \end{array}$$

11. $43\ 329 + 1259 + 2771 =$ _____

12. A phone company sold 972 phones in August, 1328 phones in September and 1455 in October. How many phones were sold altogether over the three months?

David wanted to bake a cake. He looked up a recipe and went to the shop to buy the ingredients he needed. Below is his receipt.

Answer the questions using the information on the receipt.

1kg bag of flour **€1.49**

6 eggs **€1.99**

500g bag of sugar **€1.20**

350g cocoa powder **€3.45**

200g chocolate chips **€2.50**

500g bag of icing sugar **€1.86**

61. What is the total cost of all the items which David purchased?

62. If David brought a €20 note with him to the shop, what change would he receive?

63. There was a 20% off promotion running that day. What is the new cost of David's shopping?

64. David only needed 2 eggs to bake his cake. If the eggs were sold individually, what would the cost of 2 eggs be?

65. David needs to put 60g of chocolate chips into his cake. What fraction of the chocolate chips will be used?

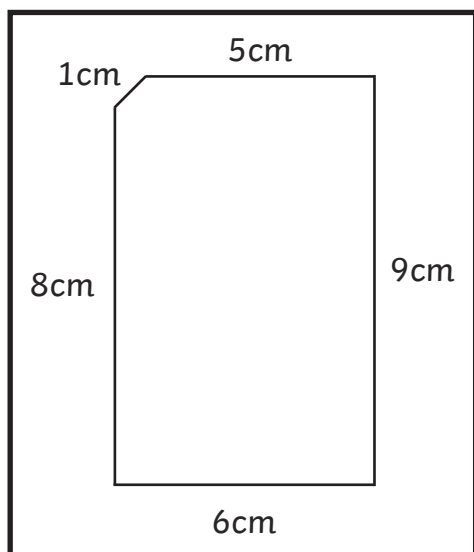

66. $10 \times 8 - 5 =$ _____

67. $200 \div 10 \times 5 =$ _____
